

**Coursework Overview****Weight: 20% of Final Grade****Coursework I: Tech in Daily Life- Individual Presentation (20% of the Final Grade)**

Storytelling is one of the most powerful communication skills. In this assignment, you will deliver a short, personal story that shows how specific technology (an app, software, or system) has improved or challenged your life. The goal is to engage your audience, explain your experience clearly, and connect it to broader issues in technology and society.

---

**Task**

- Prepare and deliver a 3-minute individual presentation in which you narrate a personal story related to technology.
  - Choose one technology (e.g., mobile app, software, digital tool, system).
  - Structure your story with:
    1. Problem – What challenge or need did you face?
    2. Experience – How did you use this technology? What happened?
    3. Outcome – What changed as a result? Did it solve your problem or create a new one?
  - End your presentation by connecting your story to a wider issue (e.g., digital habits, education, communication, health, social media use).
- 

**Guidelines**

- Maximum Time: 3 minutes
  - Maximum Slides: 4 (no text-heavy slides)
  - Language: Clear, accurate, professional English
  - Style: Narrative (tell a story, not just a report)
  - Visual Aids: Simple and supportive (images, icons, screenshots if needed)
  - Individual Presentation: Each student presents their own unique story
-

### Assessment Rubric (20 Marks Total)

| Criteria                              | Marks | Description                                                                                                                                                  |
|---------------------------------------|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Content (Story Relevance and Clarity) | 5     | Story clearly relates to a specific technology. Problems, experiences, and outcomes are well explained. The wider connection to society/technology is clear. |
| Structure and Organization            | 5     | Presentation has a logical flow: introduction → problem → experience → outcome → conclusion. Within time limit (3 mins). Clear opening and closing.          |
| Language and Style                    | 5     | Use of accurate, professional English. Clear pronunciation, grammar, and vocabulary. Storytelling tone is engaging (not reading notes).                      |
| Delivery and Engagement               | 5     | Confident body language, eye contact, voice clarity, and timing. Effective use of visuals. Audience feels engaged throughout.                                |

---

### Submission & Presentation Date

- **In-class presentations:** 13th Oct-24th Oct (Consult the tutorial lecturer for your exact date and time)
  - **Slides submission to LMS deadline: On the day of the presentation**
- 

### Tip for Success

- Pick a story that is personal, relatable, and specific (not too general).
- Use a clear problem → experience → outcome structure.
- Strictly adhere to the time limit
- Keep visuals simple—your story is the focus.
